The compact TA range are vertically mounted line shaft pumps with intermediate bearings for line shaft support. Pump construction generally complies with the requirements of API 610 (VS4). Many applications can be supported with open or enclosed line shaft configurations combined with various shaft sealing options such as gland packing and mechanical or gas seals.

### APPLICATIONS

Surface & waste waters Medium slurries with abrasive solids or fibres Recycled waters Blow down drains

Examples:
Steel mills
Chemical & Petrochemical
plants
Oil & Gas
Paper mills
Power plants
All kinds of sump duties

## FEATURES

Easy maintenance...

Space coupling allows seals/bearing servicing without pump removal, replaceable wear plate

Top or bottom mounted seal option Media or external lubrication option

**Construction** Vertical Suspended Line Shaft with Intermediate Bearings

Design Standards API 610 latest edition ISO13709

Hydraulic Options

ATEX 94/9/EC

Homogeneous slurries. Medium Hydrocarbons. Fibres and solids in suspensions. Pre Treatment and Electro Coat paint. Primary, secondary & activated sludge. Liquids with entrained gases.

#### **NK Closed**

Clean/contaminated fluids. Chemical & petrochemical slurries. Juices & juice slurries. Light Hydrocarbons

## **FN Vortex fully open**

Fibrous, textile, leather, rubber, polymer suspensions. Delicate crystals such as salt and xylene. Hydrocarbons. Generally low shear applications.

<b>Max Capacity</b>	Up to 1200m <sup>3</sup> /h**
Max Op. Pressure	16 Bar
Temperature	200°C*
Max Head	120m**
<b>Max Pump Speed</b>	3550 rpm**
Pump lengths	Up to 5.5m, longer on request
Materials	Wide range of alloys incl NACE compliant
Design Life	20 Years (3 years constant operation)
